March 9, 2006

All Direct Contract Providers:

One week from today is the deadline for all direct contract providers (DCPs) in California to submit their January 2006 data submissions under the new California Outcomes Measurement System (CalOMS Treatment) as required by the current Drug Medi-Cal (DMC) Direct Provider contract. This letter is being sent to all DCPs regardless of production status to inform you of the extension process.

The current DMC contract requires that DCPs request an extension if they are not going to meet the March 15, 2006, data submission deadline. The Department of Alcohol and Drug Programs (ADP) has established the following process for DCPs to request such an extension. All extension requests must be received by the March 15, 2006, deadline or ADP will implement the compliance process described in the DMC contract.

Extension Request

Direct contract providers wanting an extension of the CalOMS Treatment deadline must submit their request in writing according to either the Tier 1 or Tier 2 requirements below. This includes DCPs that may have already communicated with ADP in some manner regarding their organization's CalOMS status and need for an extension.

Tier 1

Direct contract providers that are currently in active certification testing of their CalOMS systems or completing subsequent transition activities, as listed on Attachment 1, and who will be able to submit their initial CalOMS data file for the January 2006 report month by April 7, 2006, may submit a simplified extension request by letter. The letter must indicate the requested extended deadline (not later than April 7, 2006) and their commitment to meeting this extended deadline.

Tier 2

Direct contract providers that are not currently in active certification testing of their CalOMS systems may request an extension by letter and must provide all of the following information:

1. Describe the current status of your CalOMS Treatment system development and the reason(s) the DCP cannot meet the March 15th deadline.
2. Identify the requested extension date to submit CalOMS Treatment data.

DO YOUR PART TO HELP CALIFORNIA SAVE ENERGY
For energy saving tips, visit the Flex Your Power website at
<http://www.flexyourpower.ca.gov>

3. Describe the good-faith efforts the DCP has undertaken to meet the established CalOMS Treatment deadline and any challenges you encountered, including:
 - a. Describe the efforts you have undertaken to clean-up your existing open CADDs cases.
 - b. Confirm and describe how the DCP has been collecting the full CalOMS data set for all transactions beginning January 1, 2006.
4. Identify the interim milestones with dates you will meet to expedite the submittal of CalOMS Treatment data (provide dates). If using a vendor, confirm milestone dates with your vendor.
 - a. Complete a Readiness Assessment conference call with ADP.
 - b. Complete in-house, provider-level system testing.
 - c. Complete your CADDs data cleanup.
 - d. Start active certification testing of your CalOMS system with ADP.
 - e. Submit production files.
5. Describe the contingency plan you will implement should you encounter problems implementing your primary CalOMS solution.
6. Schedule a Readiness Assessment conference call with ADP. Contact Ann MacDowell at amacdowell@adp.ca.gov or (916) 327-4899.

All extension requests must be signed by the DCP executive officer and should be faxed to ADP, to my attention, at (916) 323-0653 with hard copies mailed.

For any extension granted, if interim milestones or the extended deadline are missed, ADP will begin the compliance process. No extension to submit 2006 CalOMS Treatment data will be granted beyond July 10, 2006 (as specified in the DMC contract).

Approval Criteria

ADP will evaluate each extension request using the following criteria. The DCP must have:

- ▶ Collected the full CalOMS dataset for all transactions starting no later than January 1, 2006.
- ▶ Submitted a complete extension request by March 15, 2006.
- ▶ Made good faith efforts to develop and implement their CalOMS system and kept ADP informed of the barriers they have encountered.
- ▶ Have proposed a compliance/extension plan that is reasonable, attainable and provides for contingencies.

ADP stands committed to help you be successful in meeting your CalOMS obligations as well as realizing the promise of CalOMS in helping to identify and implement data-driven best practices for the treatment of California's AOD clients and the betterment of their families and communities.

DMC Direct Contract Providers
